## Hannover Chooses SEVSAT

November 2007: Panama:

Woodsons engineers recently completed the installation and commissioning of a further SEVSAT C Band Global communications antenna on board the fishing vessel Hannover in Panama. Hannover, a large factory freezer trawler, is currently fishing for Jack Mackerel in the South Eastern Pacific off the coast of Chile.

Operating in such remote locations requires reliable, secure communications. SEVSAT provides them with this with an 'always on unlimited use' data service and low cost voice with crewcalling.

SEVSAT Antenna arrives on board Hannover

Hannover with SEVSAT antenna in place

Operating a factory ship requires constant contact with office and the land based supply chain as she remains fishing at sea for up to 8 months at a time. With supplies being delivered at sea and fish transported back to market there is no room for communications failure.

SEVSAT is now installed on a range of commercial, Oil and Gas and fishing vessels operating globally and has proven its reliability and quality of service in the harshest conditions in the world.
