July 2008

Ocean Mainport Rescue Fleet Installs SEVSAT

Woodsons recently completed the installation and commissioning of the 9th SEVSAT system to be installed onboard OMR's fleet of vessels operating from Aberdeen. This completed the project, which commenced in April 2008, of the installation of SEVSAT systems onboard Ocean Mainport Rescue's fleet of 9 vessels.

Ocean Mainport Rescue operate 9 ERRV (Emergency Response and Rescue Vessels) from Aberdeen and were quick to realize the importance of having fast and cost effective broadband communications onboard their ships.

9th SEVSAT antenna secure and in place onboard the Ocean Spey

OMR's ERRV's are stationed at sea for a minimum of 30 days and return to port for 24hrs only to carry out crew change and any essential repairs. It was therefore important that the installations were rigorously planned to fit in with the vessels tight turn around schedule and that the systems were trouble free from the start. After only 4 months, all 9 vessels SEVSAT installations were complete and operational from the North Sea to Nova Scotia.

Each of OMR's vessels is configured with an unlimited data connection interfaced to their existing networks providing connectivity for both vessel management and wireless connection for crew relaxation onboard. As well as internet access, there are 3 telephone lines on each vessel, 2 with Aberdeen dial tone and the 3rd line set up for private crew calling as well as free calls between vessels.

Ocean Tern installs SEVSAT in drydock earlier this year before sailing for Canada

Steven Wood, Sales Director of Woodsons commented 'The OMR contract has been extremely important for both ourselves and Ship Equip in Aberdeen, as it has allowed us to demonstrate our high level of knowledge and commitment both in the field of Satellite communications and general marine electronics'

Ship Equip continue to deliver totally managed high bandwidth broadband to ships at an ever increasing rate. Within the last few years Ship Equip has been the fastest growing VSAT provider in the World and the leading provider of VSAT solutions worldwide
